The AGRG EYWA devices are unique in their ability to connect sounds with the breath of nature and to reveal the inner world of each device in every kind of wood.

World's first designer solid wood readers

Metal Inlay

In EYWA ART INTARSIA readers, we use a unique decorative technique of inseting non-ferrous metal (gold, silver, platinum or copper) into specially prepared wood surfaces

You could choose & install
any Access Control Systems.
**But everybody will see
only AGRG® EYWA®
Readers !**

AGRG® EYWA® Art

The AGRG® EYWA® Art collection offers a wide range of finishes, colors and textures for fine woods.

AGRG EYWA BUTTON T

New IoT Product

Your button can work in any access control systems (ACS), as well as in Tuya Smart infrastructure, the global IoT platform

AGRG EYWA Reader and EYWA BUTTON T

Turnstiles and security gates

Collaboration with

Since 1974, Gotschlich has been the only manufacturer of turnstiles and security gates in Austria.

Technology partnership with HID Global on "HID Global Advantage Partner Program".

Collaboration with

Our clients:

Lakhta Center in St. Petersburg

The readers are used at the Lakhta Center in St. Petersburg where Gazprom headquarters are located. Lakhta Center is the tallest building in Russia and Europe with a tower height of 462 meters. British architect and author of the Lakhta Center concept Tony Kettle was the head of RMJM design team before starting his own company.

Our clients:

World Class fitness clubs

Obviously, our Readers look great in the most demanding luxury clubs.

EYWA® INDIVIDUAL LOGO | BRICK ASH

Our clients:

Skolkovo Golf Club

The readers are used at the Skolkovo golf club, created by the legendary Jack Nicklaus and the Millhouse investment company. Players have everything at their disposal: from a world-class Jack Nicklaus Signature Field designed together with landscape designer Linda Bird, to a club house designed by prominent Japanese architect Shigeru Ban.
